

SINGLETRAILER II SPORT

- 24" wheel for more comfort and excellent rollover characteristics, especially off-road
- Strong and lightweight CrMo steel frame with integrated roll cage for children from 3-months to 5 years of age
- Comfortable child seat with five-point safety harness and breathable seat cover
- Magnetic three-point buckle from Fidlock for easy operation
- 180 mm - 220 mm adjustable travel and ground clearance for off-road use
- Compatible with most dropper seatposts
- Integrated stand / bash guard protects the frame and cover
- Single-track chassis with tilting technology - very little lateral forces act on your child or cargo while cornering
- 29er compatible geometry for wheel size flexibility

SINGLETRAILER II SPORT

The Singletrailer II Sport 24" is a premium, single-wheel suspended child carrier for sporty use and uncompromising off-road control. The redesigned drawbar improves compatibility with 29" mountain bikes and E-MTBs without extending the wheelbase. With the new Singletrailer II Sport, even the most rough climbs can be mastered with ease and the descent on the trail turn into pure pleasure.

As a passenger, your child will enjoy the benefits of the comfortable cabin interior, adjustable weather-proof ripstop cover, and smooth suspension. The lightweight steel frame and adjustable suspension keep your child safe and comfortable while offering unrivalled handling. The machined alloy drawbar crosslink with sealed-bearings means the trailer stays firmly attached with quiet, smooth and stable connection over the roughest terrain. A range of accessories lets you configure the cabin for the safety and support of children ages 3-months to 5-years (25kg).

Please note: The Singletrailer II does not include attachment hardware (hitch and shim), so make sure to buy each item separately.
